## Introduction:

Welcome to the world of Atom Ant! A meme token that provide utility. Atom Ant it's much more than just a meme token. We are a project with a mission to provide value to the token through deflation and an investment wallet, all decided by the community via surveys.

## Opportunity:

Most meme coins do not create any value, they are only supported by the community. Atom Ant wants to change the Mame Coin world by giving value to her work. This is a great opportunity, join this change

## How It work

Atom Ant will launch a presale to raise funds that will be used to provide liquidity to the market. The remaining part will be sent to the "investment wallet". Here the first revolution begins! Atom Ant will have a wallet, owned by the community, where coins will be purchased in this percentage:

35% Bitcoin

35% Altcoins

30% Other projects.

This wallet will be increased month by month. As?? thanks to a tax on sales transactions. We will have 1% tax which will be distributed as follows: 0,50% investment wallet, 0,25% team and development 0.25% burn! Yes, you read that right, Atom Ant will have the ability to burn tokens in order to create deflation and a sharp decrease in tokens in circulation.

## Token

We will launch an Airdrop equal to 5% of the supply, the presale will be 60% of the \$Atom Ant tokens. The Team will receive only 5% of the tokens blocked for a year and then distributed among the collaborators. To provide liquidity to the market there will still be 25% another 5% will be burned

## Token2022 Solana

The Token-2022 program is a great product from the continuous evolution of the Solana ecosystem. By offering enhanced functionality, modular design, and the potential for future expansion through extensions, it empowers developers to craft sophisticated and innovative token applications. This, in turn, fuels the growth of a vibrant and diverse tokenized landscape on Solana. Every day hundreds of identical memecoins are created that destroy investors' wealth. Token2022 will be the future of the Solana blockchain.

## Pre-sale

The presale and the funds raised will be distributed as follows: 55% blocked liquidity 10% Team and development 30% Investment wallet and buybacks 5% which will be burned. Through surveys, the community will decide which tokens to purchase and keep in the investment wallet. The Team will always give explanations for all movements carried out in the investment wallet

## Staking

The investment wallet with the presale funds, thanks to the tax on sales transactions and we hope also thanks to the bull run, which can increase the value of the tokens in possession will be distributed through staking. It will be the community, through a survey, to decide the times and percentage of staking.

## Roadmap

### First phase:

- Website Creation
- Creation of social channels
- Token Creation
- Airdrop

### Second phase:

- Ico launchpad
- Creation of investment wallets
- Marketing
- Dex Quote

### Third phase:

- Burn
- Community polls
- Crypto purchase
- Buybacks

### Fourth phase:

- Cex Quotation
- Staking
- New projects
- Platform development

### Disclaimer

Atom Ant, including but not limited to the overall project, token, website, smart contracts and any app presented in this concept Any terminology used in this whitepaper, on the website or within the app is intended as a basis only reference, without any actual or legal meaning of the same terms in a regulated and/or financial context. The token it is strictly a utility token in all jurisdictions and is not and cannot be deemed to be a “security” or otherwise regulated token of any kind.

The token is in no way electronic money and/or fiat money, nor an asset supported stable coins, both global and limited

in scope. This whitepaper taken in itself is not a contract or contractual clause agreement of any kind, nor does it constitute an invitation, solicitation or offer to invest in the token or acquire or use tokens in any way and with any expectation of profit from it.
